This document contains a system overview drawing, as well as detailed wiring information.

Material is designed to supplement the AJ 300 Series Chart Recorder Installation, Wiring and Operations manual. Be sure to follow proper guidelines for mounting, as well as the connection to an AC power source.

NOTE
As shown, this system addresses all requirements of the Pasteurized Milk Ordinance (PMO) section covering “Combination Electronic Thermometers for Batch Pasteurizers.” This “concept” was approved at the 2005 National Conference on Interstate Milk Shipments (NCIMS). The upcoming re-write of the Pasteurized Milk Ordinance will include these new details.

For any additional Regulatory issues pertaining to the use of these components as described, please contact:
